

User Guide

Bulk Delivery Instructions

Version: 3.0.0 | Revised: 09/21/23

Step 1:

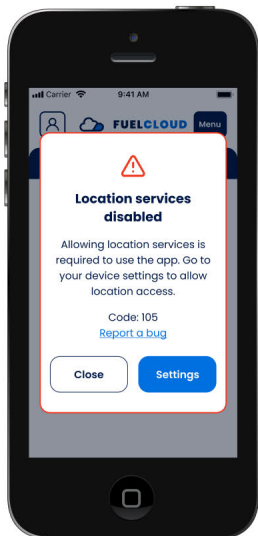

Tap the Account button in the top left to log into the FuelCloud app.

Seeing something different?

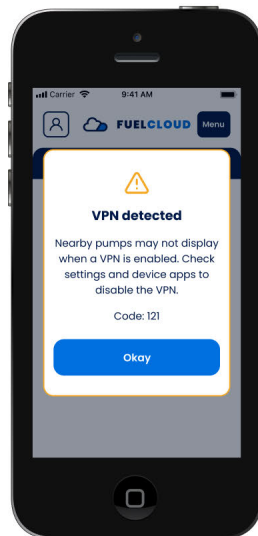

- A. This modal means 'location services' is turned off for the FuelCloud app. Without location services activated, the FuelCloud app can't find target tanks. Tap 'Settings' and enable the location setting while using the app to continue fueling.

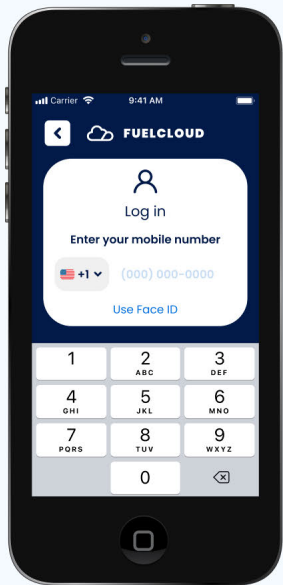

- B. This modal means a VPN is enabled on the device. A VPN may hide your current location and cause the app not to display nearby pumps. Turn off the VPN to continue fueling.

A.

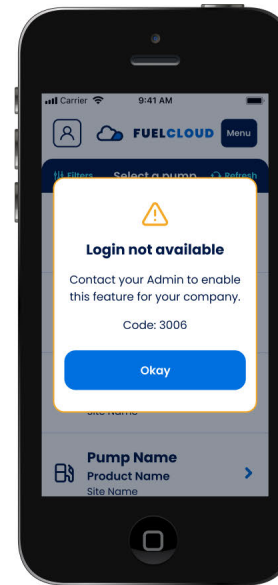

B.

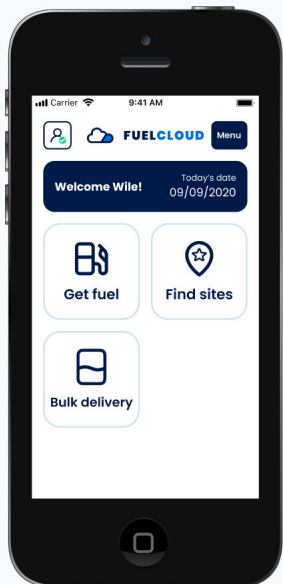

Step 2:

Enter your phone number and driver PIN. If you are logging in for the first time, enter the SMS code sent to the phone number entered.

Seeing something different?

This modal means that your Admin has not enabled FuelCloud app login.

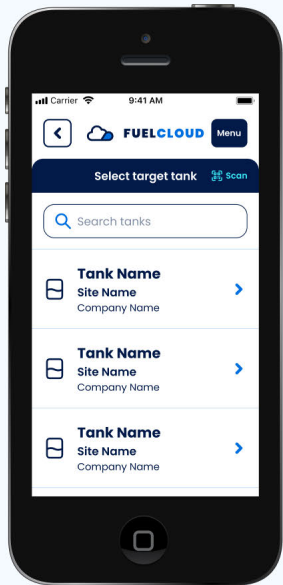

Step 3:

Select Bulk delivery.

Bulk delivery not available?

Contact your Admin to check that your Driver Fill permissions are enabled.

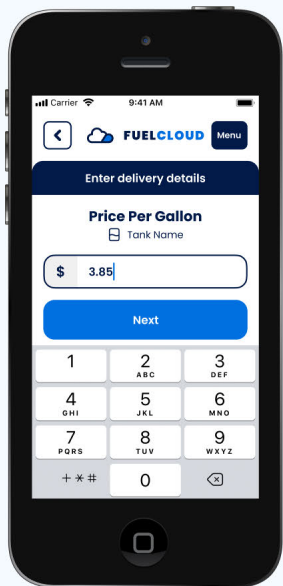

Step 4:

Select a tank from the tank list or, if the barcode value has been added in the FuelCloud Web Portal, scan the tank's barcode.

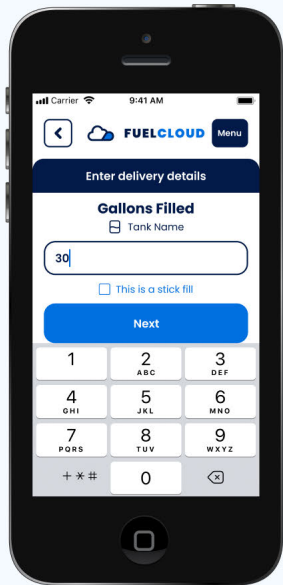

Not seeing the target tank?

Ask your Admin to check that the tank is active and its site coordinates are correct.

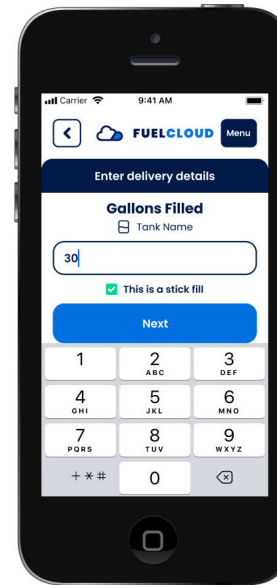

Step 5:

Enter the price per gallon, up to 4 decimals.

Step 6:

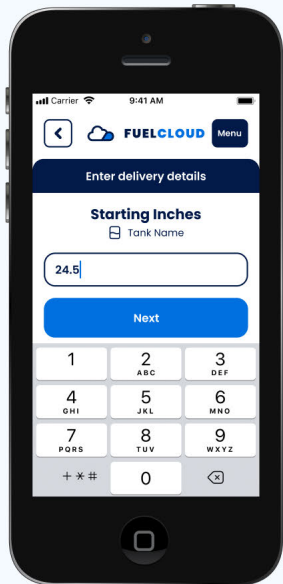

Enter total gallons, up to 3 decimals.

Using Stick fill?

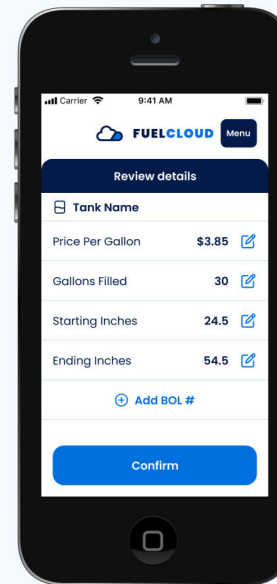

Along with total gallons, enter the starting and ending inches.

If the Stick fill option should be available but is not, talk to your Admin to verify the tank dimensions are entered in the FuelCloud Web Portal.

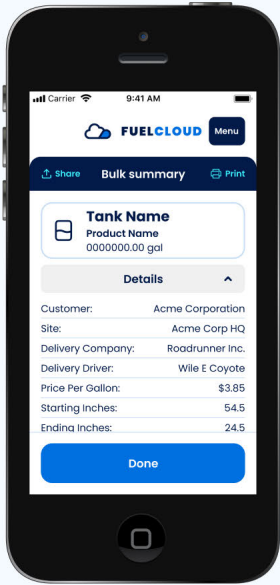

Step 7 (Stick fill only):

Enter starting and ending inches for the tank.

Step 8:

Review delivery details and select the edit icon to update any answer. Add a BOL #, if needed. Once everything looks good, tap Confirm.

Step 9:

That's it! You can share or print the summary, then tap 'Done' when you're finished.

Supported Printers

Model	iOS	Android	Bluetooth	Wi-Fi
Brother RJ-3050	✓	✓	✓	✗
Epson TM-T88V	✓	✓	✓	✓

The Epson TM-T88V printer comes in various models with different connectivity capabilities. Please confirm the model you are purchasing has the capabilities you want.
